

The Best Medicine *in* America.

The Best Medicine *for* America.

March 6, 2014

The Honorable Barack Obama
President of the United States
1600 Pennsylvania Avenue NW
Washington, DC 20500

Dear Mr. President:

On behalf of the Board of Directors of the American Medical Group Association (AMGA), I am writing to you concerning the fiscal year (FY) 2015 Budget of the United States Government and the restrictions it places on providing certain advanced imaging services. As you continue to work with Congress to determine how to best navigate the fiscal challenges facing our nation, we respectfully ask you to reconsider any proposals that would restrict the ability of multi-specialty medical groups and health systems to coordinate the care of their patients by eliminating their ability to furnish advanced imaging services.

AMGA represents some of the country's largest, most prestigious integrated health care systems and multi-specialty medical groups. The nearly 125,000 physicians practicing within AMGA's member groups deliver health care services to more than 130 million patients in 49 states, and include such distinguished groups as the Mayo Clinic, Cleveland Clinic Foundation, Advocate Medical Group, Ochsner Clinic Foundation, Johns Hopkins University School of Medicine, Geisinger Health System, Henry Ford Health System, and the Permanente Federation.

Multi-specialty medical groups invest in sophisticated information technology, care management processes, and teams of providers to coordinate high quality care. Prohibiting physicians practicing in multi-specialty medical groups from referring patients for advanced imaging services within their groups would have a devastating impact on some of this country's leading health care organizations, the patients they serve, and the integrated infrastructure that exists to deliver better health care at lower costs. Instituting such restrictions runs counter to the Administration's efforts to stimulate greater integration and care coordination in our health care system.

Patients who reside in rural or underserved areas would face additional hardship as a result of this proposal. If multi-specialty medical groups in these areas are prohibited from providing advanced imaging services within their four walls, patients will have to undergo the inconvenience of traveling much longer distances in order to receive necessary advanced imaging services. This delay could potentially result in missed diagnoses, or treatment of illnesses that if diagnosed earlier, would have better outcomes and be less costly to treat.

CHAIR

Howard B. Graman, MD, FACP
PeaceHealth Medical Group

CHAIR ELECT

Don L. Wreden, MD
Sutter Health

SECRETARY

Donn E. Sorensen, MBA, FACMPE
Mercy

TREASURER

Norman H. Chenven, MD

Grace E. Terrell, MD, MMM, FACP, FACPE
Cornerstone Health Care, P.A.

Susan A. Terry, MD, FACP
University of Utah Community Clinics

Tim Weir, MHA, MBA, FACHE
Olmsted Medical Center

Many multi-specialty medical groups utilize decision support tools to ensure that clinical decision-making is supported by evidence before ordering advanced imaging services. These groups have spent a great amount of time redesigning their internal processes, in collaboration with their group's radiologists, to ensure that such services are only furnished to patients when medically necessary.

We appreciate the Administration's efforts to improve our nation's current fiscal condition and we request that any budget proposal moving forward will preserve the ability of multi-specialty medical groups and health systems to provide advanced imaging services.

Thank you, Mr. President, for taking our comments into consideration. As always, our members and I stand ready to work with you on this important health care issue.

Sincerely,

A handwritten signature in black ink, appearing to read "Donald W. Fisher". The signature is fluid and cursive, with a prominent initial "D" and "W".

Donald W. Fisher, Ph.D.
President and CEO
