

Influenza Vaccine Adult (Inactivated) 2020-2021 Flu Season (brand name Fluzone and Fluzone High Dose)

Influenza Routine Vaccination Schedule:

1. Pediatrics 6 months – 8 years old: 1 dose every year
2. If child has not received two doses before July 1, 2020 (even if given in different seasons), give 2 doses separated by 4 weeks. Give the 1st dose as soon as possible after vaccine becomes available to allow the 2nd dose to be received by the end of October. For children aged 8 years that need 2 doses of vaccine, **both doses should be administered even if the child turns age 9 years between receipt of dose 1 and 2.**
3. Ages 9 years and older: 1 dose every year

Contraindications (do not give Flu vaccine):

1. Life-threatening allergic reaction after a previous dose

Precautions (check with provider before giving):

1. Ever had Guillain Barré Syndrome within 6 weeks after a previous influenza vaccine
2. Feeling sick or has a fever
3. Suspected or confirmed COVID-19 (consider delay for 7 days after afebrile)

Route: IM

Dose: 0.5 ml Influenza Quadrivalent for patients 6 months-64 years (may use 0.25 ml for patients 6-35 months); 0.7 ml Influenza Quadrivalent High Dose for patients 65 years and older

Injection site: vastus lateralis for children < 3 years old; deltoid muscle for children > 3 years old (with adequate deltoid muscle mass otherwise use vastus lateralis) and adults

Protocol Authorization

This protocol shall remain in effect for all patients of the Norton Medical Group until rescinded.

Norton Medical Group July 2020

Td Vaccine Adult (brand name Tenivac)

Td Routine Immunization Schedule: (see Tdap protocol)

1. Adults 19 years and older: one dose every 10 years. It can be given earlier after a severe or dirty wound or burn. Tdap can be given as one of these boosters if patient has never had it before or patient is pregnant.

Contraindications (do not give Td):

1. Life-threatening allergic reaction after a previous dose of any diphtheria or tetanus containing vaccine

Precautions (check with provider before giving):

1. Pregnant (patient should get Tdap if pregnant)
2. Ever had Guillain Barré Syndrome
3. Has latex allergy (syringes only)
4. Feeling sick or has a fever

Route: IM

Dose: 0.5 ml

Injection site: deltoid muscle of arm

Protocol Authorization

This Protocol shall remain in effect for all patients of the Norton Medical Group until rescinded.

Medical Director's signature:  date: 6/25/18

Herpes Zoster (shingles) Recombinant, Adjuvanted Vaccine (RZV) (brand name Shingrix)

RZV Routine Immunization Schedule

1. Adults 50 years and older: 2 dose series given 2-6 months apart

Contraindications (do not give RZV):

1. life-threatening reaction after a previous dose of zoster vaccine (either Zostavax or Shingrix)

Precautions (check with provider before giving):

1. Feeling sick or has a fever

Route: IM

Dose: 0.5 ml

Injection site: deltoid muscle of arm

Protocol Authorization

This Protocol shall remain in effect for all patients of the Norton Medical Group until rescinded.
