

Creating a healthier tomorrow.
Thank you for making this possible.

AMGA Foundation Impact Report

Honoring 2025 Donors

amga.org/foundation

Dear AMGA Foundation Participant and Supporter,

When I look back on 2025, I don't just see progress—I see momentum. I see a community that is not waiting for the future of healthcare to arrive but is actively shaping it.

This has been a defining year for AMGA Foundation. Together, we have demonstrated what is possible when purpose, partnership, and innovation align. What excites me

most is not only what we achieved, but also the pace, scale, and ambition with which we are advancing change across the country.

Across our collaboratives, we are no longer simply sharing best practices; we are setting new ones. We are accelerating the adoption of evidence-based care, scaling what works, and closing the gap between innovation and implementation in ways that directly improve lives.

Our Rise to Immunize® (RIZE) campaign exemplifies this impact at scale. Surpassing more than 34 million vaccinations is not just a milestone. It is proof that when we align around a common goal, we can move the needle nationally on population health.

We also took a bold step forward with the launch of the Obesity Quality & Innovation Collective (QuIC), uniting organizations committed to transforming care for one of the most complex challenges in healthcare today. This is exactly the kind of work that will define the next era of healthcare.

At the same time, our continued investment in initiatives like the Dr. Barney Newman Collective for Quality & Innovation in Ambulatory Palliative Care reflects our commitment to ensuring that innovation extends across the full continuum of care—from prevention to advanced illness—grounded in compassion, dignity, and quality.

Equally important, we are advancing this work with an unwavering commitment to addressing health disparities. We are not satisfied with improvement alone. We are focused on ensuring that progress reaches every patient, every community, and every population we serve.

None of this happens without you. This is a collective achievement, driven by your leadership, your expertise, your generosity, and your willingness to challenge the status quo. You are not just participants in this work; you are catalysts for change.

As we look ahead, I am more energized than ever. The challenges in healthcare are real, but so is the opportunity. Together, we have built a platform—and a community—capable of leading transformational change at scale.

We are not just building programs. We are building a movement to redefine how we transform care and achieve better outcomes and experiences for our patients.

Thank you for your partnership, your leadership, and your belief in what we can achieve together.

With gratitude,

Edward M. Yu, MD, FFAFP, CMQ, CPE

*Vice President Value & Population Health, Palo Alto Foundation Medical Group
Chair, AMGA Foundation Board of Directors*

“AMGA Foundation is helping healthcare organizations turn innovation into action. Through collaboration, shared learning, and a commitment to improving outcomes, we are creating healthier communities and advancing a healthier tomorrow.”

Beth Averbeck, MD, ACC, FACP
Senior Medical Director, Primary Care
HealthPartners Care Group
Chair, AMGA Board of Directors

Our Impact

45 million patients with improved healthcare over the past decade. Most recently:

- Rise to Immunize® campaign administered or documented **34.9 million** adult vaccinations; exceeded **30M** goal 18 months early; **86** organizations, **30** states, **54,352** physicians engaged

- **4,000+** providers across **12** organizations in **12** states; high-intensity statin prescribing **45.3% → 46.7%**; LDL-C control **27.2% → 28.2%**

- **20 participating organizations** developed and implemented strategies that increased colorectal cancer screening rates to 66.2%

- **8** participating healthcare organizations in the **Dr. Barney Newman Collective for Quality & Innovation in Ambulatory Palliative Care**; focus on symptom management, interdisciplinary care, care coordination, family-centered support

Our Population Health Initiatives

AMGA Foundation advances population health by bringing together healthcare leaders, clinicians, and care teams to address some of the nation's most pressing chronic health challenges. Through collaborative learning, quality improvement initiatives, and shared innovation, we help participating organizations identify, test, and scale evidence-based approaches that improve patient outcomes, strengthen care delivery, and reduce health disparities. By fostering the exchange of knowledge, data, and real-world experience, we equip healthcare organizations with the tools and insights needed to drive meaningful change across the continuum of care. The following initiatives highlight our work to improve health outcomes and support healthier communities in 2025.

Rise to Immunize®

The AMGA Foundation's Rise to Immunize® (RIZE) campaign has exceeded its ambitious goal of documenting or administering 30 million adult vaccinations by 2027. Through the dedication of 86 participating medical groups and health systems across 30 states, representing more than 54,000 physicians, the campaign reached 34.9 million vaccinations. This milestone reflects the power of collaboration, data-driven improvement, and a shared commitment to protecting patients and communities from vaccine-preventable disease.

- **34.9 million adult vaccinations administered or documented** through the campaign by the end of 2025
- Exceeded the campaign's 30 million vaccination goal **18 months ahead of schedule**
- **86** participating medical groups and health systems
- **30** states represented
- **54,352 FTE physicians** engaged through participating organizations

Vaccines Administered or Documented

By the end of 2025, participating organizations had documented or administered:

Vaccine	Total
Influenza	22,383,119
Pneumococcal	1,395,508
Td/Tdap	3,706,478
Zoster	2,533,872
RSV	77,659
COVID-19	2,580,243

Improvement Metrics

- **Zoster vaccination rates increased 17.9%** since the campaign launched in 2021
- **Td/Tdap vaccination rates increased 4.5%**
- Since being added to the campaign in 2024:
 - **Hepatitis B vaccination rates increased 3.2%**
 - **RSV vaccination rates increased 7.9%**

“The biggest benefit of participating in the AMGA Colorectal Cancer Screening Collaborative was the opportunity to learn directly from peer health systems across the country. We shared priorities, challenges, and the initiatives that proved most effective. AMGA’s process improvement framework also helped us clarify objectives and prioritize interventions. We moved from a narrow definition of success to a coordinated, data-driven strategy by aligning workflows with available data and training providers and frontline teams to use smart data tools. As a result, we saw measurable gains in screening rates and more equitable access to related services for our patients.”

Nkem O. Akinsoto, MSc
Assistant Director, Population Health
UW Physicians

Obesity Quality & Innovation Collective (QulC)

In 2025, the AMGA Foundation launched the Obesity Quality & Innovation Collective (QulC), bringing together healthcare organizations committed to advancing evidence-based obesity care. Through collaborative learning, quality improvement efforts, and peer-to-peer sharing, participants worked to standardize care, strengthen outcomes measurement, and improve access to treatment for patients living with obesity.

Program Highlights

- **10 participating health systems and medical groups**
- More than **50** clinicians and staff engaged
- **6** states represented
- Potential to impact more than **100,000** patients

Obesity Management Collaborative

The Obesity Management Collaborative continued to support healthcare organizations in addressing one of the nation's most pressing chronic health challenges. Through expert-led education, peer learning, and practical implementation strategies, participants explored approaches to improving obesity care delivery and patient outcomes.

Collaborative Focus Areas

- Reducing stigma and bias in obesity care
- Integrating emerging therapies into practice
- Strengthening multidisciplinary care teams
- Expanding access to evidence-based treatment

Participant Outcomes

- Shared implementation strategies across participating organizations
- Developed scalable obesity care models
- Increased focus on equitable access to treatment

Dr. Barney Newman Collective for Quality & Innovation in Ambulatory Palliative Care

In 2025, the AMGA Foundation launched the Dr. Barney Newman Collective for Quality & Innovation in Ambulatory Palliative Care, convening eight healthcare organizations from across the country to advance care for patients living with serious illness. The collective created a national forum

for health systems to share best practices, identify barriers, and develop innovative approaches to symptom management, interdisciplinary care, care coordination, and family-centered support. By bringing together organizations ranging from those with established programs to those building new services, the initiative is helping expand access to high-quality ambulatory palliative care while strengthening support for patients and families throughout their care journey.

Program Highlights

- **8 participating healthcare organizations** representing a range of program maturity, from established leaders to emerging services
- Focus on **symptom management, interdisciplinary care, care coordination, and family-centered support**
- **Established a national forum** for innovation and shared learning in ambulatory palliative care

“As a long-time AMGA member and supporter of AMGA Foundation, I’ve seen how shared learning transforms patient care. By funding the Dr. Barney Newman Collective for Quality & Innovation in Ambulatory Palliative Care, I’m

helping future patients receive compassionate care when they need it most, while extending the impact of my giving for years to come. Knowing my support can give families more moments together—free from pain and surrounded by care—is deeply meaningful. This collaboration makes a huge difference, and I’m proud to be a part of it.”

Barney Newman, MD

Type 2 Diabetes Collaborative

The AMGA Type 2 Diabetes Best Practices Learning Collaborative supports healthcare organizations in advancing evidence-based care for adults with type 2 diabetes and obesity. By combining expert guidance, peer-to-peer learning, and quality improvement strategies, participating organizations work to improve diabetes control, achieve clinically meaningful weight loss, and enhance long-term health outcomes.

Through the collaborative, healthcare leaders and care teams share best practices, address barriers to care, and implement sustainable, equitable approaches that can be scaled across diverse care settings, helping drive meaningful improvements for patients and populations alike.

Chronic Care Roundtable

The Chronic Care Roundtable (CCR) convened twice in 2025, continuing its tradition of bringing together healthcare leaders, clinicians, and industry partners to explore innovative approaches to improving care for patients living with chronic and preventable diseases. Through collaborative discussions, participants examined emerging trends, shared best practices, and identified practical strategies to advance population health, health equity, and patient outcomes across the continuum of care. The program concluded at the 2026 AMGA Annual Conference, marking the successful completion of a longstanding initiative that fostered collaboration, advanced thought leadership, and helped shape approaches to chronic disease management across the AMGA community.

“One of the greatest benefits of participating in the Type 2 Diabetes Collaborative is the opportunity to learn alongside organizations from across the country that are equally committed to improving care for patients with diabetes

and obesity. The collaborative provided practical strategies, expert guidance, and a supportive community that helped us identify new opportunities to improve outcomes, reduce barriers to care, and strengthen our approach to chronic disease management.”

Charlotte Flood, CMPE, MHA

*Chief Executive Officer, Northwest Primary Care
AMGA Board Director*

Looking Ahead

Upcoming programs launching in 2026 and 2027:

- **Cardiovascular Risk Optimization Best Practices Learning Collaborative**
- **Vaccine Confidence QuIC**
- **Infant RSV QuIC**
- **Shingles QuIC**

“Obesity is one of the most complex and consequential health challenges facing patients today. Improving outcomes requires more than treatment alone. It requires collaboration, innovation, and a commitment to rethinking how care is delivered. We are proud to support AMGA Foundation’s efforts to bring healthcare leaders together to share best practices, improve access to evidence-based care, and help more patients achieve better health.”
