

Vaccine Storage Best Practices

Carrie Regnier, BSN, MPH, RN
Director, COVID-19

Solution Example- Medication Labels

- Required for any vaccine or medication that is removed from its original package and not given immediately.
 - Prefill syringes do not require labeling unless siblings are being immunized at same time.

Solution Example- Standard Storage

- Reviewed various storage solutions for immunizations including self contained options and those that were available from distributors
- Best decision for us: Medical Grade Fridges and Freezers with continuous data loggers (regular and backup)

Solution Example- Storage Labeling
